CAREER OBJECTIVE

Mechatronics Engineering undergraduate with a multidisciplinary foundation in robotics, embedded systems, automation, and software development, plus hands-on exposure to AI workflow tools and RPA platforms. Seeking a Robotics / Automation / AI / Embedded Systems / RPA / Software Development internship to apply strong programming and problem-solving skills to real engineering challenges and deliver measurable value to a fast-paced technical team.

EDUCATION

B.E. Mechatronics Engineering

2025 – Present (Expected 2029)

Coimbatore Institute of Engineering and Technology, Coimbatore

- HSC — 60.66%, Tamil Nadu State Board (2024)
- SSLC — 56.06%, Tamil Nadu State Board (2021)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Core CS: Data Structures & Algorithms (DSA)

Web Development: HTML5, CSS3, JavaScript, Bootstrap (responsive, DOM-driven interfaces)

Embedded Systems: Arduino Programming & Interfacing, microcontroller & sensor integration

Mechanical: Mechanical Assembly & Fabrication, AutoCAD 2D Drafting

Automation / RPA: Automation Anywhere (RPA), Python for Automation (basic)

Artificial Intelligence: Machine Learning fundamentals, AI workflow tools (Make.com, MCP servers, REST APIs)

Soft Skills: Problem Solving, Teamwork, Communication, Time Management

INTERNSHIP EXPERIENCE

Actively seeking a first internship in Robotics, Automation, AI, Embedded Systems, RPA, or Software Development — available immediately, open to remote / on-site / hybrid roles.

PROJECTS

AI Resume Builder

2026

HTML5, CSS3, JavaScript, GitHub Pages

- Designed and built a fully responsive, browser-based resume builder that generates an ATS-friendly resume in under 2 minutes, using dynamic DOM manipulation for real-time editing and instant preview.
- Implemented client-side state handling (local storage) so users can update resume sections without page reloads or data loss.
- Deployed the application on GitHub Pages with cross-device responsive layout, verified on desktop, tablet, and mobile breakpoints.

RPA Foundations & Hands-On Workshop Project

2026

Automation Anywhere, RPA

- Built end-to-end RPA workflows in Automation Anywhere, automating repetitive data-entry tasks using variables, loops, and conditional logic.
- Automated Excel-based data handling and processing steps, cutting manual effort on sample business workflows.
- Tested and deployed bots across multiple workflow runs, validating reliability before hand-off.

CERTIFICATIONS

- Robotic Process Automation — Automation Anywhere
- AI Workflows: Make.com, MCP Servers & API Integration
- Responsive Web Development — HTML5, CSS3, Bootstrap
- Generative AI Buildathon — Certificate of Participation

ACHIEVEMENTS

- Completed the Automation Anywhere RPA Workshop, gaining hands-on experience building enterprise automation bots.
- Competed in a Generative AI Buildathon, developing an AI-driven solution under time constraints in a team setting.
- Participated in multiple hackathons, strengthening rapid prototyping, teamwork, and problem-solving under pressure.
- Competed in the E-Kart Championship, applying mechanical design and systems-integration skills to a functioning electric kart, and attended technical workshops on emerging engineering and software tools.
